PROFESSIONAL SUMMARY

Full Stack Developer and recent BSIT graduate with hands-on experience designing, developing, testing, and maintaining web applications, from a Backend Developer internship at the Department of Science and Technology (DOST) to freelance systems delivered end to end for small businesses since 2024. Ships REST API endpoints in Node.js/TypeScript with Jest unit tests in Agile/Scrum sprints, turns user requirements into working systems, and documents the work (SDLC docs, code reviews). CISDP and Cisco CCNA certified.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Python, SQL, HTML5, CSS3
Frontend & Backend: React JS, Tailwind CSS, Angular (exposure), Node.js, Express.js, PHP, Laravel (exposure), REST API Design, MVC Architecture
Databases: PostgreSQL, MySQL, Supabase, Real-time Databases, Relational Database Design, Parameterized Queries
Testing & DevOps: Jest, Postman, Test-Driven Development, Git, GitHub, Docker, Podman, Vercel, OpenProject, DevHub
AI & Practices: Ollama (local LLM), NLP Sentiment Analysis, Prompt Design, Agile/Scrum, Code Review, JWT Auth, Zod Validation, Rate Limiting
Quality & Documentation: Unit Testing, Debugging, Code Review, Microsoft Office, SDLC Docs (DFDs, ERDs, Use Case Diagrams)

WORK EXPERIENCE

Backend Developer Intern | Department of Science and Technology (DOST) — EIS Microservices Team | Feb – Jun 2026 | Bicutan, Taguig City

- Implemented and shipped 8+ RESTful API endpoints for the DOST Enterprise Information System (EIS) microservices using Node.js, TypeScript, and PostgreSQL; tested with Postman and managed containers with Podman.
- Wrote Jest unit test suites covering API endpoints and database query logic for every file created, maintaining coverage across 3+ Agile sprint cycles before each code review submission.
- Refactored backend tickets using MVC principles after senior-developer Knowledge Transfer sessions, improving maintainability and conformance to team coding standards.
- Used DevHub for repository management and OpenProject for sprint ticket tracking across Agile/Scrum ceremonies; resolved a 500 Internal Server Error through controller and service-layer debugging with senior developers and QA.

Freelance Full Stack Developer | Self-Employed | Jan 2024 – Present

- Delivered 3 client web systems independently: gathered requirements, designed the UI, built backend integration, tested, deployed, and handed over to the client (see Freelance projects below).

PROJECTS

Smart Feedback Analytics for Faculty Evaluation | Capstone, Sole Developer | React, Node.js, TypeScript, PostgreSQL, Ollama | 2025 – 2026
Faculty evaluation platform with 4 user roles, 6 CRUD modules, and a local-LLM action-plan generator with rule-based fallback. Secured with JWT, Zod, rate limiting, and 7 Jest security tests.

Lurk POS System | Cafe POS and inventory | JavaScript, Real-time Database | Sep 2026 – Present
Live shared stock across devices, staff PIN login with activity log, simulated supplier auto-reordering, and nightly closing-count reconciliation.

Fit Cheque | E-commerce web app | React (Vite), Node.js/Express, Supabase | fitcheque.store | Sep 2026 – Present
Online store with product catalog, cart, user sign-in/registration, profiles, and an admin dashboard, deployed on Vercel.

Solar Materials Estimator | Client demo | JavaScript, HTML/CSS | Planned launch 2027
Converts a household's monthly electric bill into a ballpark solar system size: panel count, inverter rating, mounting/cabling estimate, and hybrid battery sizing.

Constellation Studio | Generative art | JavaScript, Canvas API
Interactive canvas animation where users place stars and draw constellations, with drifting and shooting stars in the background.

Maison Eclair | Editorial web page | HTML/CSS
Editorial-style page with scroll-driven animation.

Clinic Appointment Booking System | Freelance | React, Node.js, PostgreSQL | Jan 2024 – Feb 2024
Online scheduling across 3+ service categories for a 5-person dermatology clinic team.

Events Styling CRM | Freelance | Web application | Mar 2024 – Jun 2024
Client management dashboard replacing spreadsheets, tracking 20+ clients with booking history.

Reseller Order Management System | Freelance | Web application | Jul 2024 – Dec 2024
Automated order status updates and email notifications, removing manual follow-ups.

Personal Portfolio Website | chriscidportfolio.vercel.app
Portfolio site showcasing my projects, deployed on Vercel.

EDUCATION

Bachelor of Science in Information Technology (BSIT) — Far Eastern University (FEU) Roosevelt, Marikina City | Graduated 2026

- Dean's Lister — Second Honors, Second Semester AY 2022-2023 (GPA: 3.800). Coursework: Software Engineering, Web Development, Database Management, Systems Analysis, Computer Networks, Information Security.
- Certifications: CISDP — East West International Educational Specialist (Jul 2025) | CCNA: Enterprise Networking (May 2025) | CCNA: Switching/Routing (Feb 2025) | CCNAv7: Intro to Networks (May 2025)
